EXPERIENCE

APPRENTICE DEVELOPER, NASHVILLE SOFTWARE SCHOOL
OCT 2016 - MAR 2017

- Built web applications employing myriad front-end development technologies such as Angular JS, jQuery, SASS, Bootstrap, Browserify, and more
- Engineered robust, scalable databases using Python, Django and Sqlite3
- Completed a front-end capstone using the Twilio API to send SMS notifications from a web app
- Built a simple web API for a vendor site using the Django REST framework
- Applied both Agile/SCRUM and Kanban methodologies in planning and implementing Github workflows during team sprints
- Strove for technical proficiency with a number of side projects, which included building social media bots and developing Python games.

CRYPTOLOGIC LINGUIST, US ARMY
NOV 2011 - OCT 2016

- Translated and transcribed Arabic-language communications to provide timely, actionable intelligence to decision-makers
- Employed data analysis tools to identify reportable patterns in foreign social media chatter
- Served on a Special Operations Team-Alpha to support tactical advising missions within 5th Special Forces Group for 2.5 years

PROJECTS

- Waves '87: A video game built with Python that I conceptualized and coded with a team over the course of 48 hours for Global Game Jam http://globalgamejam.org/2017/games/waves-87-business-cruizin
- Whistler: An app I built with Twilio and Angular that allows for emergency contacts to receive customized texts if a timer is not stopped: https://github.com/stagg0saurus/whistler
- Bangazon-Storefront: A vendor site built with a team employing Django that uses an API built with Django REST to access data. https://github.com/peterStaggs/bangazon-storefront
